#### How to Install the Pivot Ball into a Rod End or Shock Absorber

 $\widehat{1}$ 

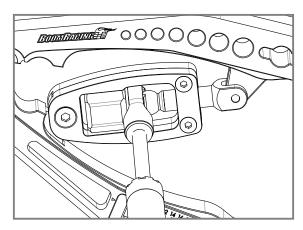

Rotate the die to the installation position.

(Refer to the highlighted die position in the illustration.)

2 Insert the pivot ball on the side from which you want to punch it in. Ensure the pivot ball is facing the punch side.

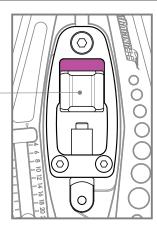

3 Align all components carefully before compressing the punch to install the pivot ball.

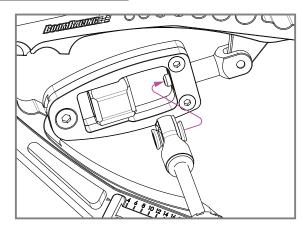

### How to Remove the Pivot Ball from a Rod End or Shock Absorber

(1)

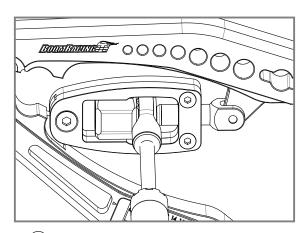

Rotate the die to the removal position.

(Refer to the highlighted die position in the illustration.)

Position the rod end or shock absorber so that the side you want to punch the pivot ball out from is facing the die side.

(3) Align everything properly before compressing the punch to remove the pivot ball.
